 - VREMS
 - Poll Pad
 - ePulse
 - TotalVote
 - Frequently Asked Questions
-

History of VREMS

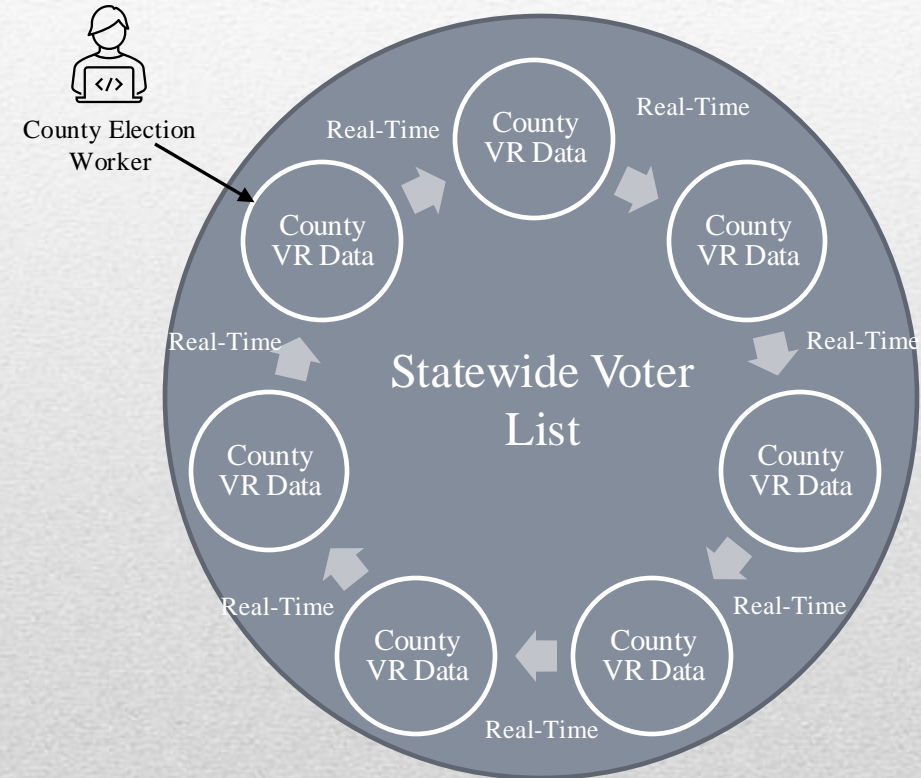

- The Help America Vote Act (HAVA) of 2002 requires states to adopt a computerized statewide voter registration list.
- States responded to this requirement in different ways.
 - Some states adopted a **single, central platform at the state level that connected to terminals in local jurisdictions. This type of system is typically referred to as a “top-down”** voter registration system.
 - Other states have a state voter registration database **that gathers and aggregates information from their local jurisdictions’ voter registration databases. This type of system is typically referred to as a “bottom-up”** system.
 - Other states have what is **termed a hybrid system, a system with a mix of top-down and bottom-up characteristics.**
- **AB422 (2021)** - Requires the Secretary of State to establish and maintain a centralized, **top-down database that collects and stores information** relating to **voter preregistration and registration** from all counties prior to the 2024 general election.
 - TotalVote
 - Poll Pad
 - ePulse

Top-Down vs Bottom-UP

Bottom-Up Approach (Old/County Legacy)

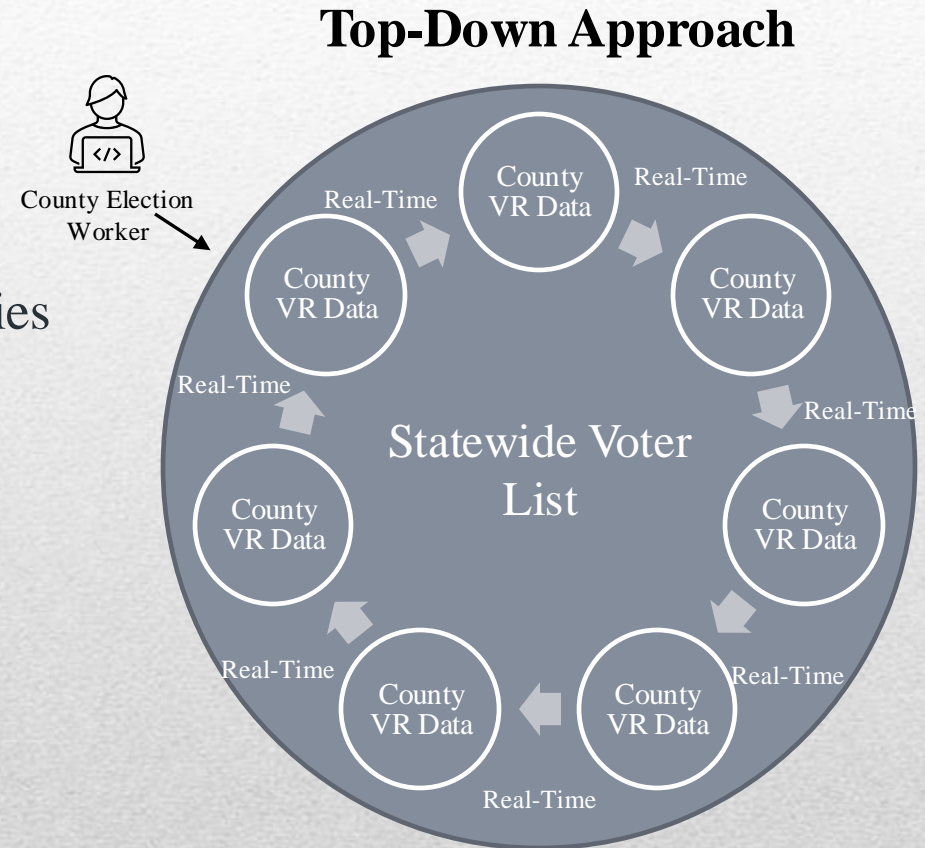

Top-Down Approach (New/VREMS)

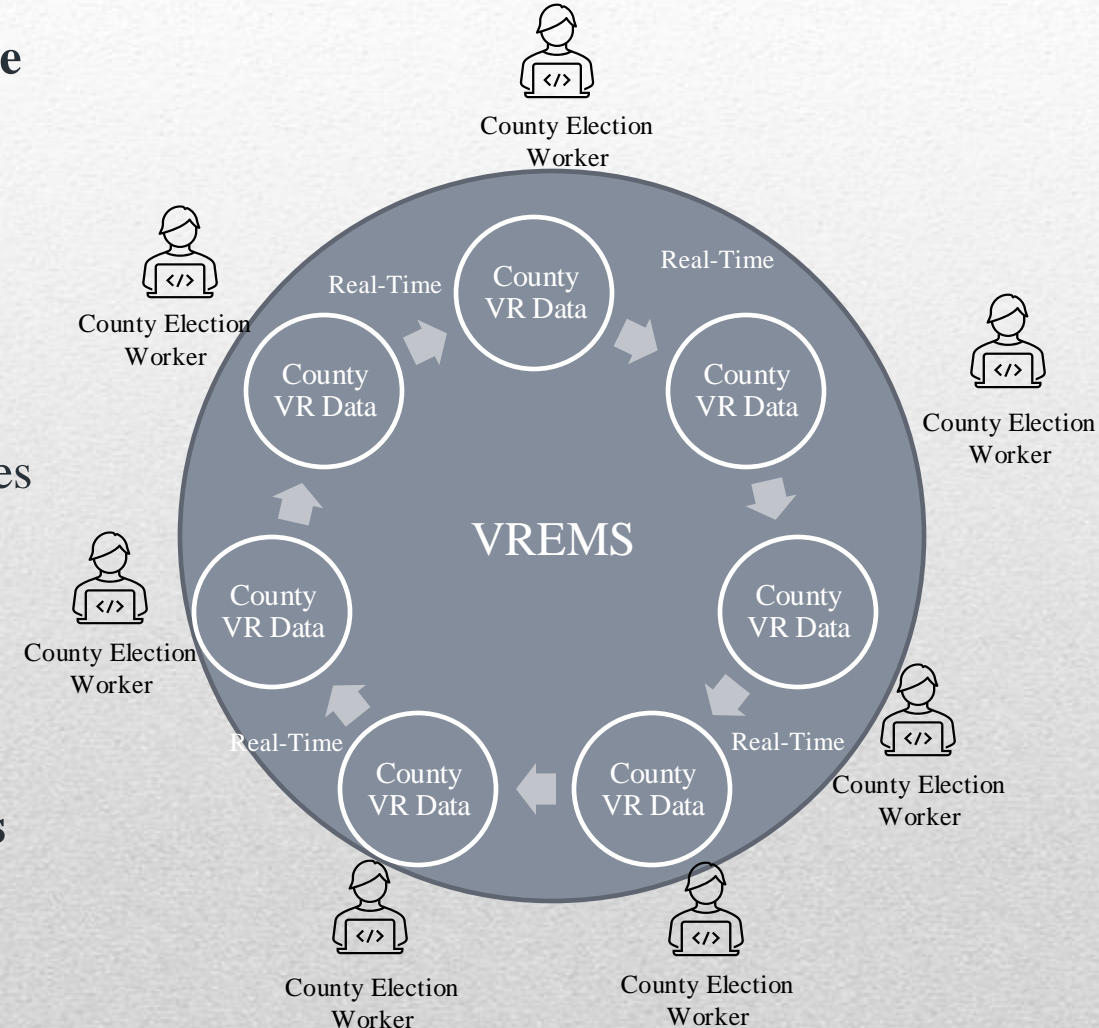

Top-Down Benefits

- **Reduced time** to validate **new voter** registration applications
- **Improved reporting and data** for statistical analysis
- **Improved reporting accuracy** by reducing latencies
- Ability to maintain **comprehensive voter history**
- **Improved service** to Nevada Citizens
- **Increased Automation** and Efficiency gains
- **End-to-End Election Management**

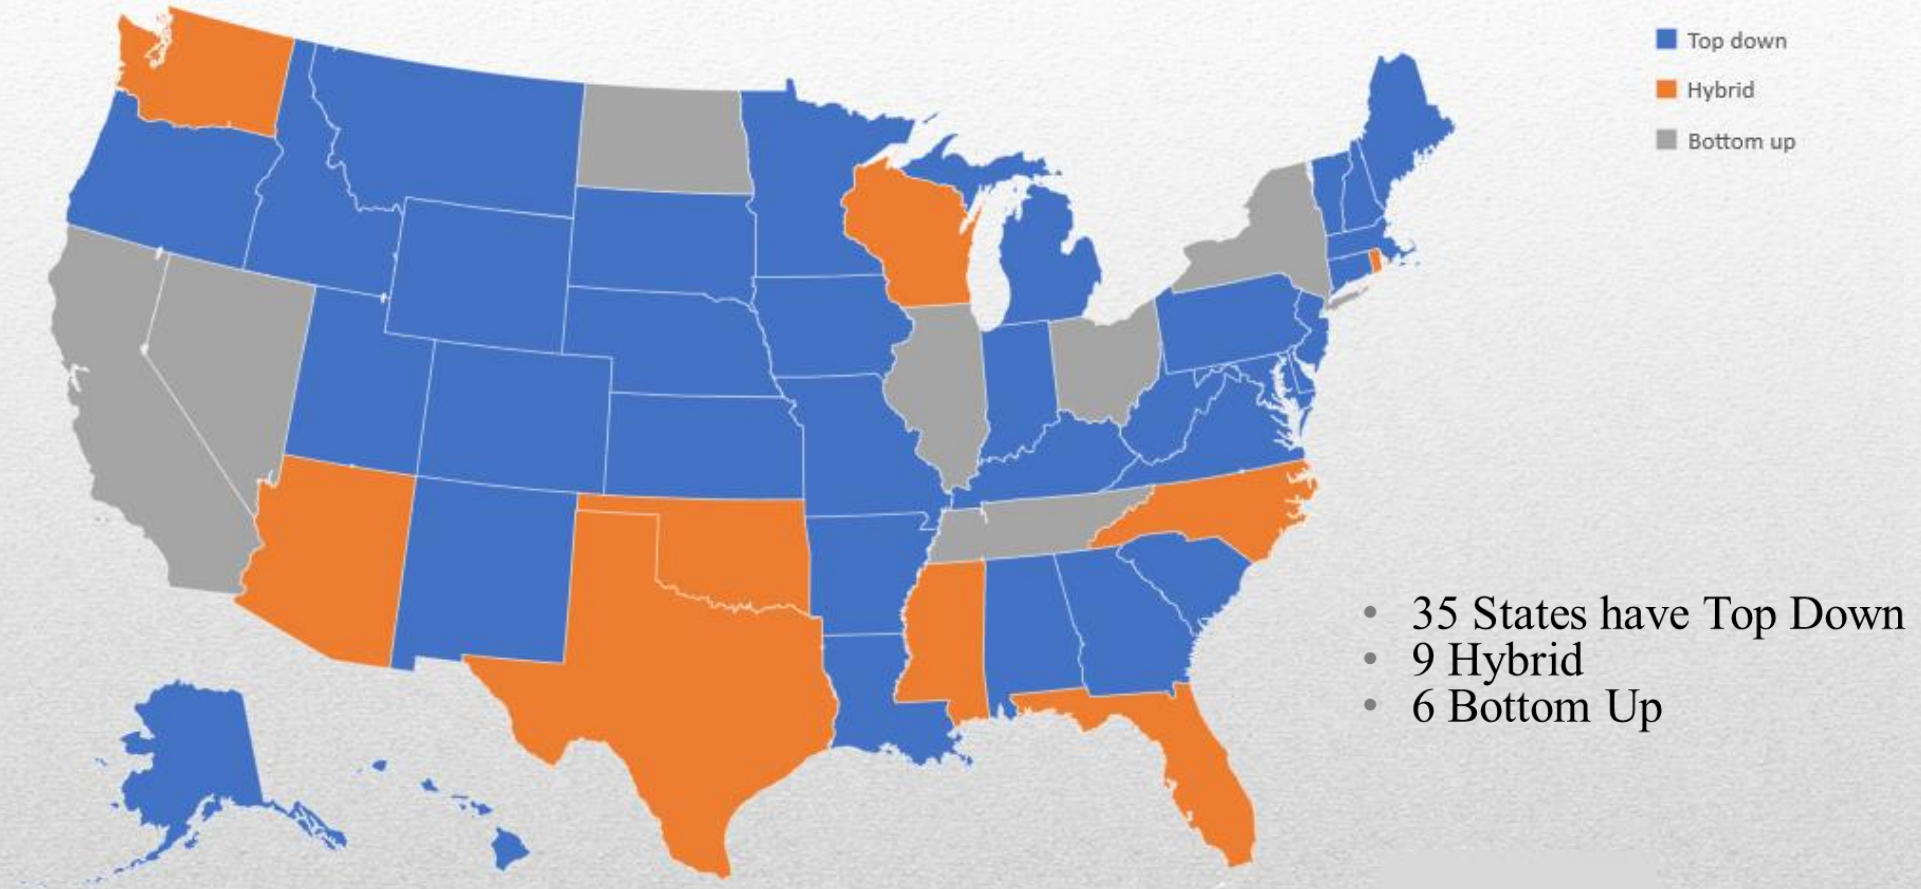

VREMS Will Impact Everyone

- **Shifting some responsibilities from the Counties to State**
 - State will lead on **System Security Standards and Practices, training & training materials, etc.**
 - County Election Officials retain statutory responsibility for voter rolls
- Enhanced need for **coordination to standardize** processes
- **Allows Counties to retire their current Voter Registration and Election Management Systems**
- Many states utilize a **cost model that shares costs across the State**

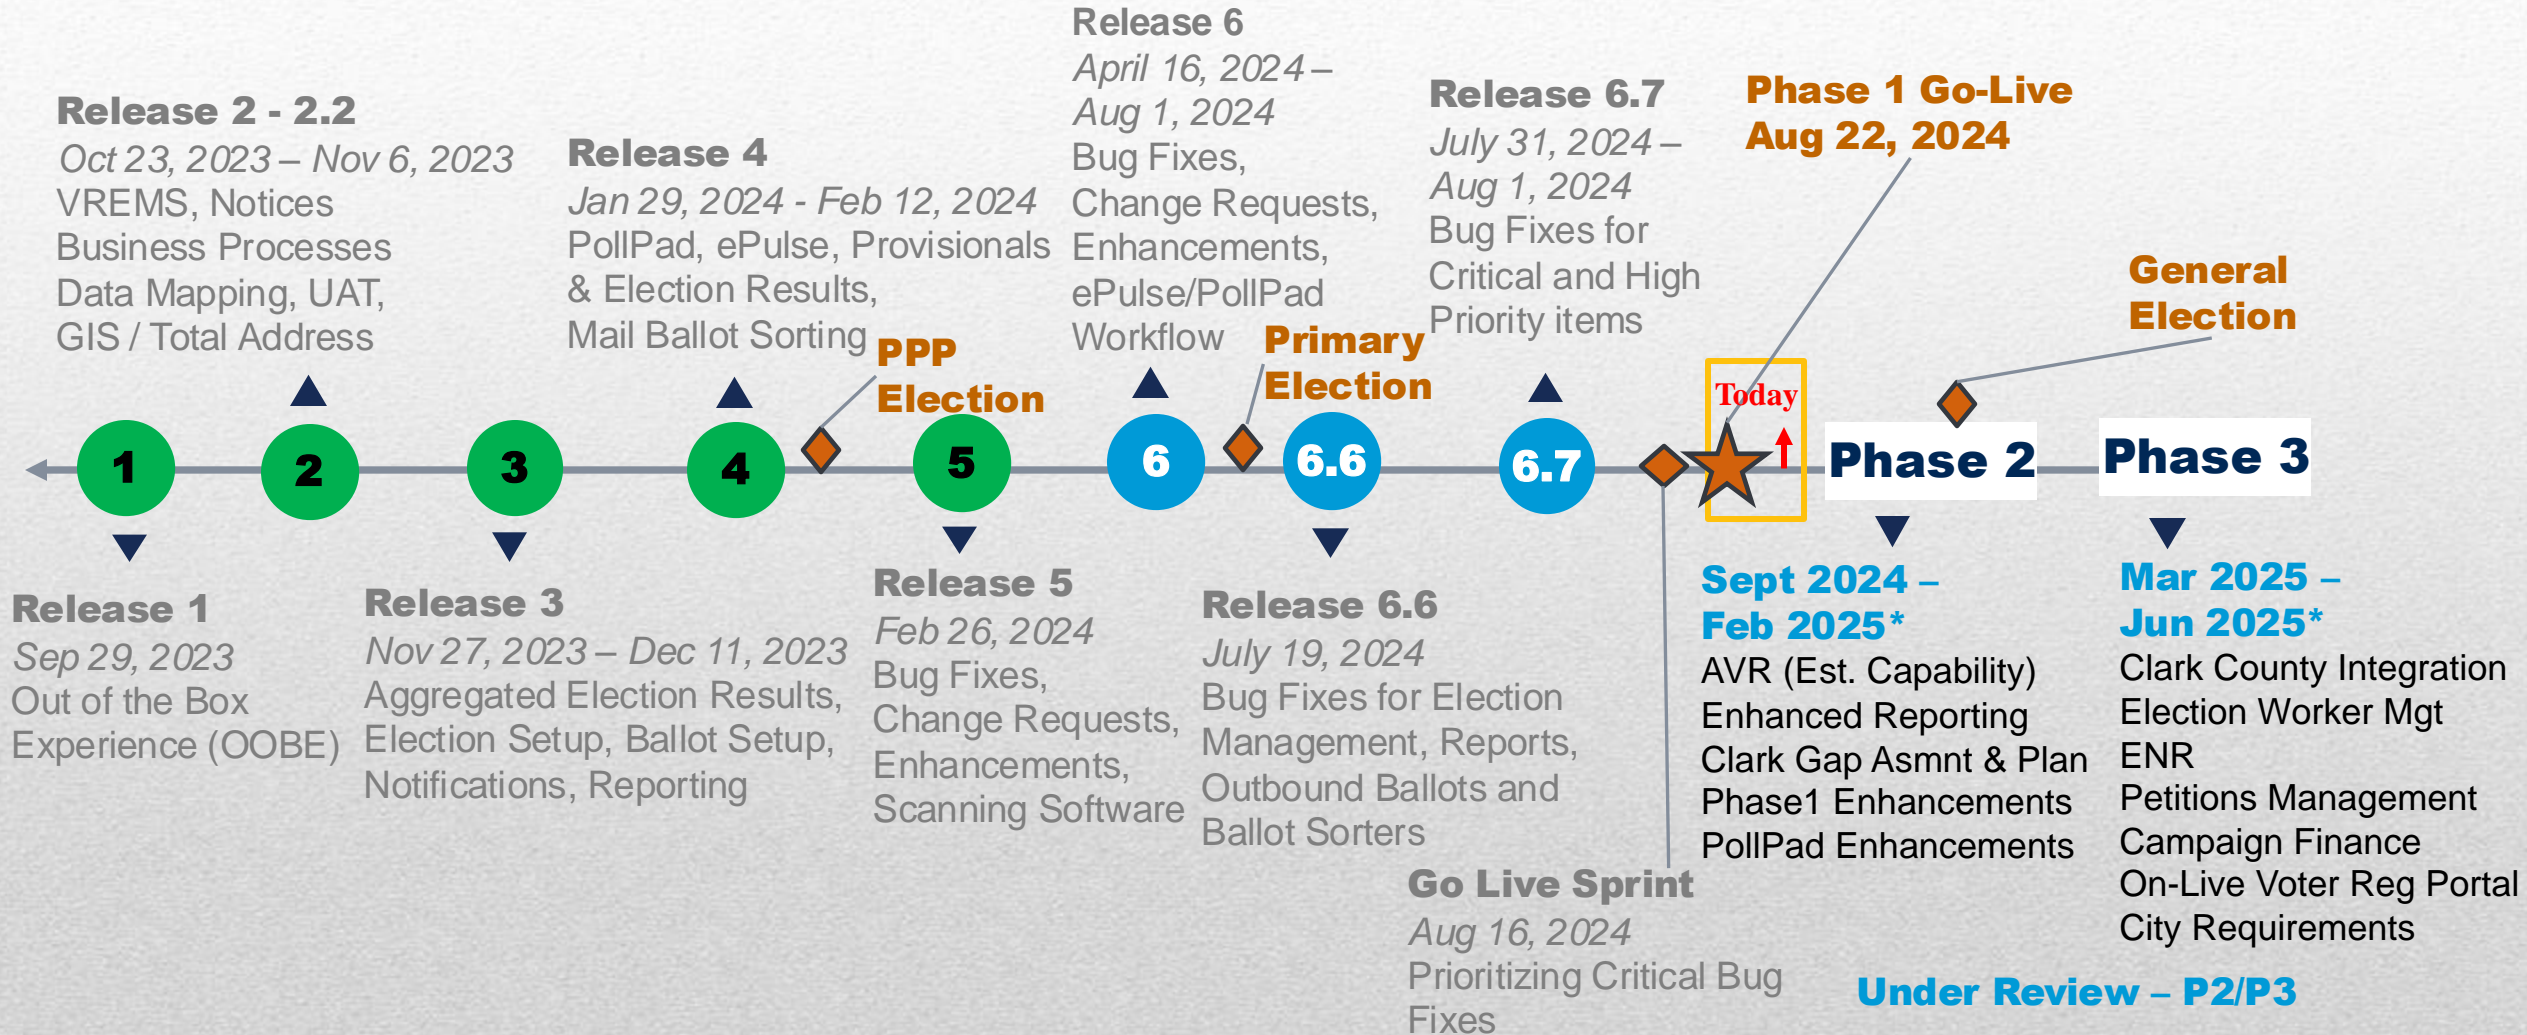

Voter Registration System Type

<https://www.eac.gov/statewide-voter-registration-systems>

Project Timeline

***Phase 2 & 3 Timelines and Deliverables Under Review & Prioritization**

VREMS Team and Roles

- **VREMS PMO Team (4)** - Manages the VREMS Program including Project Timelines, Implementation Strategies, Resource allocations, 3rd Party Contracts, Milestones, Risk Mitigation, and Project Status.
- **VREMS PIO (1)** - Provides VREMS public communications and collaborates on voter education and outreach.
- **Helpdesk Team (6)** - County/State TotalVote and integrations support for technical and election processing. First-line of ticket priority triage and resolution management with in-person or remote support.
- **Data & Technical Team (7)** - The Cloud Security, GIS, Governance & Regulations, Data Analysts, Database Administrators, and Technical Specialist collaborate to define and construct a secure system with an efficient process model.
- **Quality Team (3)** - Manages the Testing, Defect Management, Release strategies of Systems development functionality. The team ensures the program development meets the defined requirements.
- **Training Team/Technical Writers (4)** - This team has integration points with Quality and Help Desk teams primarily but also ensures that Counties have consistent and standardized training curriculum. Tech Writers provide User Guides and Training Materials.
- **SME (1*)** - Election Subject Matter Experts that are the *conduit* between the new solution and the counties. They are instrumental in communicating the Election process not only all the Teams above but being the primary voice to the Counties.

*~80 County Elections / IT staff

*18 SOS Elections Division staff w/ SOS IT

*~12 KNOWiNK

*Independent Verification and Validation by Gartner, Inc.

CHOOSE IDENTIFICATION DOCUMENT ▼

If the Poll Worker identifies that the signature does **not** match, the voter must:

- A. Answer questions from the election board officer covering the personal data which is reported on the application to register to vote;
- B. Providing the election board officer, orally or in writing, with other personal data which verifies the identity of the voter; or
- C. Providing the election board officer with proof of identification as described in [NRS 293.277](#) other than the voter registration card issued to the voter.

The screenshot displays a mobile application interface for 'Washoe County Washoe County Library'. The title bar indicates 'NOV TRAINING - 11/05/2024' and 'Last Imported: 09/14/2024, 13:53:05'. The main heading is 'SIGNING COMPARISON' with 'GO BACK' and 'ACCEPT' buttons. Below this, the instruction 'Compare signature on file to voter signature' is shown. A large box contains a handwritten signature that reads 'Sample Signature'. A dropdown menu is open over the signature, listing the following options: 'Signature does not match...', 'Driver's License ID Card', 'State ID Card', 'Military ID Card', 'Tribal ID card', 'Student ID card accredited...', and 'U.S. passport'. At the bottom of the screen, a status bar reads 'SIGNATURE DOES NOT MATCH CHOOSE VERIFICATION DOCUMENT' with a downward arrow.

The Poll Worker makes a final verification of the Voter's information before proceeding.
