The Quarterly Economic & Business Activity Report provides a quarterly review and analysis of trends in economic and business activities. It is intended to provide a unique perspective on business investments and market conditions within the State of Nevada. Data contained herein is sourced to the Nevada Secretary of State and other reporting agencies, including the Nevada Department of Employment, Training and Rehabilitation.

Business Entity Filings Report Quarterly Declines in the Third Quarter of 2013 Annual Growth Remains Positive

New Entity Filings *[Leading Indicator]*

- New entity filings totaled 13,830 in the third quarter of 2013, down 5.1 percent compared to the prior quarter (Q2 2013). Despite the quarterly decline, new entity filings increased 5.7 percent compared to the same quarter last year (Q3 2012). In the past 12 months, there have been 56,596 new entity filings, up 1.0 percent from the prior 12-month period.
- Domestic (Nevada) filings fell 5.8 percent from last quarter to 12,820. However, compared to a year ago, domestic filings increased 5.8 percent. Limited Liability Companies ("LLCs") reported the only annual increase, rising 13.7 percent to 8,999. Meanwhile, Limited Partnerships ("LPs") fell 16.3 percent, while Corporations reported a decline of 8.5 percent.
- Foreign (non-Nevada) entity filings reported a 6.0-percent increase compared to the prior quarter, rising to 1,010. Compared to a year ago, foreign entity filings increased 4.3 percent, due to annual increases reported by LPs (+71.4 percent); Corporations (+5.3 percent); and LLCs (+1.9 percent).

Total List Filings *[Lagging Indicator]*

- Initial, annual and amended lists totaled 71,183 in the third quarter, down 5.9 percent from the prior quarter and up 5.6 percent from the prior year. LLCs, which represent more than half of all list filings, reported the greatest annual increase during the quarter, rising 10.6 percent to 37,142. Corporations, which account for another 43.2 percent of list filings, followed with an annual increase of 1.2 percent.
- For the past 12 months, list filings totaled 293,639, up 3.4 percent from the prior 12-month period. LLCs reported the only increase, rising 7.8 percent to 150,144. LPs fell 5.5 percent, while Corporations reported relatively no change.
- As of September 2013, approximately 288,984 entities were considered to be in "good standing," representing a 3.0-percent increase compared to the same month last year. The number of entities in good standing has now reported annual increases for nine consecutive months.

Ross Miller became the youngest Secretary of State in America and the youngest in Nevada history when he was elected in 2006. Unanimously selected by his peers to serve as President of the National Association of Secretaries of State for 2012, Ross' record of achievement since taking office reflects a true commitment to accountability and results. His accomplishments reflect a combination of enthusiasm for the job, and a vision for serving his constituents.

Analyst's Assessment

“ In September, Nevada's economy added 16,600 jobs (+1.4 percent) when compared to the same month a year ago. The leisure and hospitality sector reported the most substantial annual job growth (+6,800 jobs), driven by an increase in the food services and drinking places sector (+7,900 jobs). The trade, transportation and utilities sector followed, adding 6,500 jobs, primarily due to increases in retail trade (+4,200 jobs) and wholesale trade (+2,800 jobs). Other sectors reporting gains included government (+3,400 jobs) and education and health services (+4,900 jobs). However, these gains were partially offset by the professional and business services sector, which reported a dramatic decline of 5,800 jobs after three consecutive months of relatively stable performances.

Job growth continues to help drive down unemployment in the Silver State. In September, the unemployment rate fell to 9.2 percent, which is 1.2 percentage points lower than the rate of 10.4 percent reported a year ago. In addition, initial jobless claims for the past 12 months fell 5.8 percent compared to the prior 12-month period to 206,600. With new entity filings up 5.7 percent year-over-year and positive annual employment growth, the two business activity indicators appear to be rowing in a similar direction.”

Principal Analyst, Applied Analysis

Domestic (Nevada) Entities vs. Foreign (Non-Nevada) Entities – A domestic entity is an entity created pursuant to Nevada Law that may or may not have nexus in Nevada. Its formation documents are on file and a matter of public record in the office of the Secretary of State. A foreign entity is an entity created pursuant to the laws of a jurisdiction other than Nevada, which is qualified to do business in Nevada. Generally, most foreign entities have some sort of nexus in Nevada because they qualify so they may conduct business in Nevada.

Leading vs. Lagging Indicators – Generally, a lagging indicator is a measurable economic factor that changes after the economy has already begun to follow a particular trend or pattern. A leading indicator is a measurable economic factor that changes before the economy starts to follow a particular trend or pattern. Leading indicators can be used to predict changes in the economy. In this instance, new business entity filings provide directional insight into investments and business formation in the State of Nevada.
